Generate your own electricity with solar photovoltaic

Generate your own free electricity and get paid for using it!

Install Solar panels at your home or business and generate your own free Electricity. Not only is the electricity generated free to use, you will also receive a payment of 21p for every unit you generate. Its estimated that the system will pay for itself in less than 10 years and all payments received are tax free and indexed linked to the RPI for 25 years. To receive this payment you must ensure your system is installed by a MCS Approved Installer.

For more information or for a free quotation from your **local MCS Approved Installer** just ask for Paul on the above number.

Marshalls Electrical Contractors Ltd. Incorporated in England & Wales.
Company No. 07009874. VAT No. 876561580

You may be wondering how Solar PV electricity can benefit you and make you money. It's quite simple....

Potential Benefits 4.00kWp PV system

Based on a typical solar electricity system of 4.00kWp
 This will generate an estimated 3433.60 kWh of electricity per year. Of this 50% would be used 50% exported

Generate
 3433.60 kWh
 per year. Gov-
 ernment feed
 in tariff pays
 43.3p per kWh

Sell
 1716.8kWh of
 the generated
 3433.60kWh
 per year back
 @3.1p

Use 50% of the
generated
 3433.60kWh per
 year. Don't
 need to buy
 electricity for
 1716.8 @14p

*Tax free and
 index linked

The performance of solar PV systems is impossible to predict with certainty due to the variability in the amount of solar radiation (sunlight) from location to location and from year to year. This estimate is based upon the Government's standard assessment procedure for energy rating of buildings (SAP) and is given as a guidance only. It should not be considered as a guarantee of performance.+
